

# Petition for the Belmont Community Path

We support the development of a plan to build a public community path for pedestrian and bicycle use on the strip of land located behind Channing Road and parallel to the commuter rail tracks between Belmont Center and Brighton Street.

This plan should address the need for appropriate fencing, landscaping, and other design features reasonably required to meet concerns expressed by abutters.

This segment will complete an off-road link from Belmont Center to Alewife and will benefit current and future generations of Belmont residents by offering convenient access to public transportation, healthful recreation, and a reduction in traffic and air pollution on local roadways.
